## 5-STAR SERVICE. BUILT INTO EVERYTHING WE DO.

In a market where promises are easy to make, we believe results are what matter. Since 1992 we've had one philosophy: deliver premium materials with uncompromising service—every order, every time. From sourcing to shipping, we operate with precision, accountability, and speed, so you can build with confidence.

Our 5-Star Service commitment means:

- ★ World-class service — responsive, knowledgeable, and dedicated to your success
- ★ Best-in-class premium materials — carefully selected for performance, beauty, and longevity
- ★ Factory direct — fewer layers, better value, complete control
- ★ Speed to market — inventory on hand, ready when you need it
- ★ We do what we say — no excuses, no surprises, just results

★★★★★ It's a promise—earned through consistency, trust, and execution at the highest level — to our customers to deliver consistent high-level service, premium quality products, and uncompromising value. Trust is earned.

Let us show you how.

## NEW CASTLE STEEL™ DECK FRAMING

New Castle Steel™ is a leading manufacturer of light gauge steel framing. New Castle Steel™ offers cutting-edge solutions that allow you to experience new possibilities in outdoor living spaces that are built to last. Whether you're looking for durability, style, or both, steel framing has everything you need to create the perfect deck frame. Discover the future of deck design and performance with New Castle Steel™.

### NEW CASTLE STEEL FRAMING BENEFITS

#### FLAWLESS FINISH

Triple-coated steel offers consistency, durability and reliability that other materials cannot.

#### FLAT DECK SURFACE

Precision engineering ensures surfaces remain flat over time.

#### RECYCLED STEEL

Made in the USA with a minimum of 25% recycled steel, which contributes toward LEED points.

#### UPGRADED DECK FRAME

Eliminates the headaches of new PT joists which can have defects & premature rot.

## TIMBERTECH® ALUMINUM DECK FRAMING

TimberTech® Aluminum Framing gives you the long-lasting benefits you expect and outperforms other framing materials. Engineered for superior performance, TimberTech® deck framing is highly resistant to moisture damage like rust, corrosion, or mold.

### TIMBERTECH® ALUMINUM FRAMING BENEFITS

#### FIRE RESISTANT

TimberTech® Aluminum Framing comes with a Class A Flame Spread Rating, the highest available.

#### EASY TO INSTALL

TimberTech®'s smart design boosts productivity by simplifying the installation process.

#### STRONG

The strength of a TimberTech® 2x8 aluminum joist is similar to the strength of a 2x12 wood joist.

#### SUSTAINABLE

Made from recycled aluminum and can be recycled again at the end of the project.

## OUTDURE® ALUMINUM DECK FRAMING

The QwickBuild aluminum deck framing system is a versatile, moisture-proof, value-engineered, straight and level, structural solution designed for superior durability and efficient installation. Ideal for both low-height 'floating' systems over waterproof membranes, as well as structural solutions for elevated deck areas on various substrates.

### OUTDURE® ALUMINUM FRAMING BENEFITS

#### MODULAR

Easy to install components, configurable to suit all deck projects.

#### MULTI-SURFACE

Maximize your space - select from hardwood, composite, & deck tiles.

#### MULTI-HEIGHT

A range of joist-beam profiles for ultra-low to elevated decks.

#### MULTI-SUBSTRATE

Build your deck over concrete, pavers, waterproof membrane, or natural ground

## PWT™ LVL TREATED WOOD DECK FRAMING

PWT™ Treated LVL is the ONLY LVL treated during the manufacturing process. The unique TRU-CORE® technology provides uniform dispersion of the treatment throughout the thickness and length of the material, for lasting durability in exterior as well as interior applications. Strength, stiffness and uniformity are all engineered in.

### PWT™ LVL TREATED WOOD FRAMING BENEFITS

#### CONSISTENT STRENGTH

Software calculations and layouts are more convenient and accurate.

#### EASY TO WORK WITH

Weighs less than pressure treated lumber of equal size.

#### UNIFORMITY

No twist or bow and no need for crowning joists.

#### SUSTAINABILITY

Wood is the right choice for a host of construction applications. It is the earth's natural, energy efficient, and renewable building material.

**Trex** RainEscape®  
DECK DRAINAGE SYSTEM

**ZUP**  
CEILING™ AND UNDERDECK®

**FULL PROTECTION**

Installs *on top* of joists to protect them. Troughs and downspouts keep space dry. Fits 12" or 16" joist spacing.

**FAST INSTALL**

Installs under deck boards on new installations with minimal tools.

**LONG-LASTING**

Protects deck structure, 25-year warranty.

**CUSTOMIZABLE**

Brown or black options for design flexibility.

**WATERTIGHT SEAL**

PVC panels channel rainwater away.

**LOW MAINTENANCE**

Rot- and fade-resistant, no painting needed.

**STYLISH OPTIONS**

Textured finishes in multiple colors.

**SIMPLE SETUP**

Snap-in system which installs on the underside of deck joists for a quick DIY installation on a new or existing deck.

Expand Your Outdoor Living Area with an Under Deck Drainage System.

# DECKING COMPARISON

## IMPORTANT THINGS TO CONSIDER...

### <sup>1</sup>HEAT INDEX TEST

To get an accurate comparison, all deck surface temperatures were measured on the same 90 degree day, in full sun.

### <sup>2</sup>OPTIONAL MAINTENANCE

Advantage Decking™ requires periodic maintenance to preserve its color. *Looking for a grey deck?* A hardwood deck will naturally grey over time but maintain its strength and integrity.

### <sup>3</sup>ROOFTOP/LOW VENTILATION

Rooftop and low ventilation installations are not recommended for standard hardwood decking. We recommend deck tiles or some synthetic decking in these installations.

## ABOUT OUR DECKING COMPARISON CHART

The chart provides a comprehensive comparison of some of the most popular decking options available at AdvantageLumber.com®, encompassing both hardwood and synthetic choices. We have meticulously evaluated various factors such as strength, real wood lifespans, and surface temperature concerns to deliver an insightful overview of each option's performance. This quick reference chart is designed to facilitate an easy comparison, helping you make an informed decision based on your specific needs and preferences.

Explore Teak

Plantation Teak Advantage Deck Tiles® - Sarasota, Florida

NEW SPECIES

Iroko African Teak Advantage Deck Tiles® - Santa Fe Springs, California

### ADVANTAGE TEAK™

When it comes to premium hardwood decking, few names carry the weight and reputation of Teak. Prized for centuries for its golden beauty, extreme durability, and natural resistance to decay, Teak has become a benchmark in the world of high-performance wood products.

But not all "Teak" is created equal. In fact, many woods commonly marketed as "teak" are not genuine teak at all—but rather regional hardwoods with similar characteristics. At AdvantageLumber.com, we offer three types of wood that fall under the "teak" umbrella, but only one of them is the real deal.

At AdvantageLumber.com we offer 3 unique teak options...

- Plantation Teak = real, genuine teak (*Tectona grandis*)
- Cumaru Brazilian Teak = not genuine teak, but durable and beautiful
- Iroko African Teak = a teak substitute used in traditional and modern applications

These names help communicate the look, performance, and feel customers can expect, even when the species differ.

Explore DeckWise Products

## INSTALLATION PREP - Start Right

### WISEWRAP® - JOISTTAPE & LEDGERTAPE®

Protect your deck frame from wood rot, decay, and corrosion with WiseWrap®, a self-sealing, waterproof tape available in asphalt or butyl, featuring a self-adhering adhesive.

## DECK TOOLS - Make Installation a Breeze

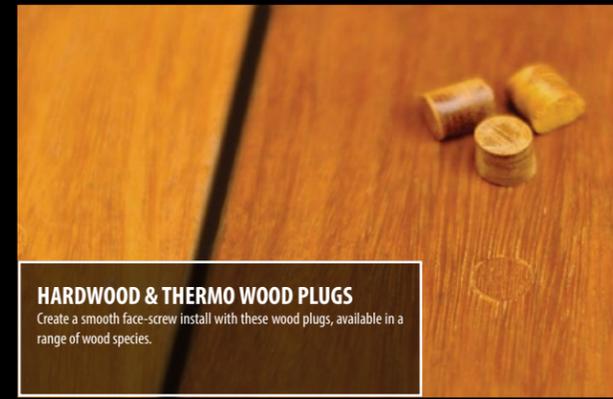

### HARDWOOD WRENCH JR™

The ultimate lightweight & economical board-bending tool! Straighten warped decking and siding boards into place, making fastener installation a breeze.

### HARDWOOD WRENCH™

The Hardwood Wrench™ tool is true a "One-Man, One-Hand Installation", meaning it is easy to operate with a single deck installer adding many benefits over other methods of straightening deck boards.

### HARDWOOD & THERMO WOOD PLUGS

Create a smooth face-screw install with these wood plugs, available in a range of wood species.

## INSTALLATION - Decking & Siding Fasteners

### IPE CLIP® HIDDEN DECK FASTENERS

Unlike most all-metal hidden deck fasteners, which can react with wood, causing staining, the Ipe Clip® allows for the natural expansion/contraction of any hardwood decking.

### THERMOCLIP® HIDDEN DECK FASTENERS

The superior design advantage ThermoClip® Hidden Deck Fastener brings over other hidden fasteners, is the absence of any aggressive sharp metal teeth that can dig in, gouge the board, and cause breakage.

### 305 & 316 STAINLESS STEEL SCREWS

DeckWise® offers a wide variety of stainless-steel deck screws for almost any installation. Color-match heads from trim-head to bugle-head, self-drilling, composite and trailer deck screws.

### WISEGUIDES®

The days of using nails for gaps are over! Build beautiful, consistent deck board gap intervals time after time for expert results.

### DRILL & DRIVE™

The Drill & Drive™ is a 3-in-1 tool you can use to pre-drill, countersink, then flip the insert and drive screws into decking.

### ROUTER BITS & PLUG CUTTERS

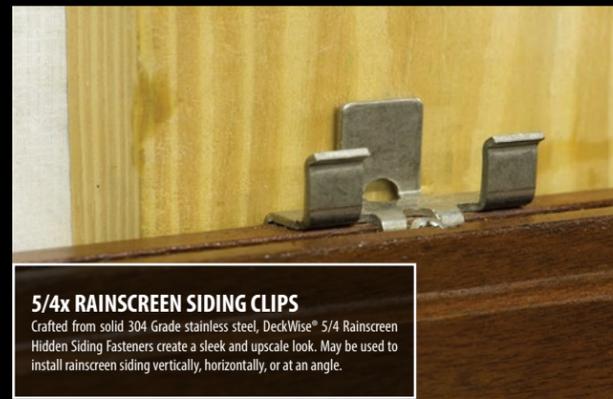

Router Bits & Plug Cutters deliver clean cuts and precision-fit plugs for a flawless deck finish.

## CARE & MAINTENANCE - Keep Your Project Looking Its Best

### 1x RAINSCREEN SIDING CLIPS

No need for furring strips. This 3/4 wood board clip is installed over plywood or OSB sheathing and provides a 3/4-inch standoff for air ventilation. Create a sleek, upscale and modern siding installation.

### 5/4x RAINSCREEN SIDING CLIPS

Crafted from solid 304 Grade stainless steel, DeckWise® 5/4 Rainscreen Hidden Siding Fasteners create a sleek and upscale look. May be used to install rainscreen siding vertically, horizontally, or at an angle.

### METAL JOIST SCREWS

DeckWise® Metal Joist Screws are specially designed self-tapping 410 stainless-steel screws for securing deck boards to steel or aluminum joists with strength and Xylan® coating corrosion resistance.

### END SEAL, WISECOAT® & IPE OIL®

For optimal care and maintenance, seal all fresh end cuts with water-based WiseSeal® or wax-emulsion Ipe Seal®. Clean and brighten weathered surfaces with the 2-part Cleaner & Brightener, then restore and protect with water-based WiseCoat® or oil-based Ipe Oil® 250 VOC and Ipe Oil® Plus 100 VOC.

EVA-LAST DECKING IS IDEAL FOR LOW-VENTILATION INSTALLATIONS

Pioneer Collection in Ipe

**EXPANDED INSTALLATION FLEXIBILITY. REAL HARDWOOD LOOKS.**  
Inspired by the bold spirit of history's pioneers, Pioneer composite redefines what composite decking can be. This Ipe alternative captures the rich color variation and authentic grain detail of the real Ipe hardwood we've proudly offered for decades—so convincingly that even professionals often need a closer look. Using advanced scans of genuine timbers, Pioneer delivers the beauty of hardwood with the long-lasting durability and low-maintenance performance of premium composite decking—backed by a fade and stain warranty that helps ensure it looks as good in 10 years as it does the day you install it, with minimal effort. We recommend Eva-Last® composite decking as an excellent choice for low-ventilation or low-clearance installations, where enhanced durability and moisture resistance are especially important.

## WESTERN RED CEDAR *BEAUTIFUL & VERSATILE*

Western Red Cedar is a top choice for outdoor projects like siding, decking, and ceilings—and for good reason! This durable wood is naturally resistant to rot, decay, and insect attacks, ensuring anything you build with it will stand the test of time. Its resilience means your outdoor structures will not only look beautiful but also require less maintenance over the years. With its timeless aesthetic and unmatched durability, Western Red Cedar is the ideal material for creating long-lasting, low-maintenance outdoor spaces.

## WHY WESTERN RED CEDAR?

### BEAUTY

Aesthetically, there really is no substitute for the natural beauty of Real Cedar. Imbued with decidedly crisp, yet superbly rich, tonal properties, Real Cedar can create sublime outdoor sanctuaries, embolden traditional home decor, provoke cutting-edge architecture and inspire innovative interiors. Imagine – all that dynamism packed into one beautiful building material!

### VERSATILITY

Western red cedar is pitch and resin-free. Which means it's ideal for accepting and holding a wide range of beautiful finishes including elegant dark stains, shabby chic bleaches, traditional solid colors and naturally beautiful semi-transparent. Real Cedar also offers a wide range of lumber dimensions, surface textures and grades. Ergo, no matter what your desired effect is, AdvantageLumber.com's got the Cedarwood for you.

### SUSTAINABILITY

Independent studies prove that when it comes to environmental performance, natural wood is superior to synthetic products in every way. While other building materials generate greenhouse gases, western red cedar actually removes greenhouse gases from the atmosphere. And unlike brick, cement and composites, Real Cedar is renewable and biodegradable. Plus, Real Cedar is sourced from the most sustainably managed forests in the world.

# ADVANTAGE™ THERMAL

**ELEVATED STYLE & INGENUITY**  
AdvantageLumber.com® proudly offers Advantage Thermal™—a versatile, high-performance wood ideal for siding, decking, and dimensional applications both indoors and out. We begin with select-grade, responsibly harvested timber and enhance it through a thermal modification process using only heat and steam—no chemicals. The result is a durable, dimensionally stable wood that retains its natural beauty while delivering outstanding performance in demanding environments. With its rich appearance, improved longevity, and eco-friendly treatment, Advantage Thermal™ is the perfect choice for sustainable, design-forward projects.

## WHERE INNOVATION MEETS BEAUTY

AdvantageLumber.com® is proud to offer Accoya® Wood, a revolutionary choice for siding that combines beauty, durability, and sustainability. Accoya® wood is made by Accoya®, which transforms fast-growing, certified sustainable wood into Accoya® wood through its proprietary acetylation process. Backed by an industry-leading warranty, Accoya® provides peace of mind and confidence for your projects. Its remarkable resistance to rot and distortion ensures a lifetime of reliable performance, making it a cost-effective solution for enduring elegance. Whether coated or left bare, Accoya® offers a superior surface to meet even the most demanding planning requirements.

AZEK ALPINE COLLECTION

## REALISTIC WOODGRAIN + MINIMAL MAINTENANCE

AZEK® Alpine is engineered to perform in high-humidity and moisture-prone environments, making it an ideal choice for ceilings, soffits, porches, gazebos, and other covered exterior applications. Manufactured from low-maintenance polymer materials and finished with a realistic, warm woodgrain cap, Alpine delivers the look of stained wood without the upkeep.

The Alpine Collection WP4 and Beadboard profiles add refined architectural detail, enhancing exterior spaces with the rich appearance of premium stained lumber and long-lasting durability.

Weathered Wallaba Shingles

**SANDURA® WALLABA SHINGLES**

Sandura® Wallaba Shingles are crafted from high-density, naturally oily Wallaba hardwood—renowned for its rich reddish-brown tones and outstanding resistance to rot, decay, and insects. Ideal for roofing and siding in harsh climates, Wallaba is a favorite for coastal, tropical, and high-humidity environments.

Over time, these shingles gracefully weather to a soft silver-grey patina, similar to the aged look of teak on classic boats, offering a refined, timeless appearance with virtually no chemical treatment or maintenance required.

Live-Edge Cumaru Slab Kitchen Island

**LIVE-EDGE WOOD SLABS**

We are one of the largest producers of live-edge slabs. Our slabs are kiln-dried to provide maximum stability and to eradicate any insects. We cut over 100 species of hardwoods including Indian Rosewood, Walnut, Camphor, Tigerwood, Brazilian Cherry, Persimmon, and many other hard-to-find lumber types. We offer surfacing, sanding, epoxy filling of voids, spray-finishing, book-matching, and gluing services, and we ship directly to you. Our slabs are often used for kitchen tables, bar tops, end tables, coffee tables, shelves, doors, wall art, benches, and many other woodworking projects.
