NEW CASTLE STEEL™

NEW CASTLE STEEL™ DECK FRAMING

New Castle Steel™ is a leading manufacturer of light gauge steel framing. New Castle Steel™ offers cutting-edge solutions that allow you to experience new possibilities in outdoor living spaces that are built to last. Whether you're looking for durability, style, or both, steel framing has everything you need to create the perfect deck frame. Discover the future of deck design and performance with New Castle Steel™.

NEW CASTLE STEEL FRAMING BENEFITS

FLAWLESS FINISH

Triple-coated steel offers consistency, durability and reliability that other materials cannot.

FLAT DECK SURFACE

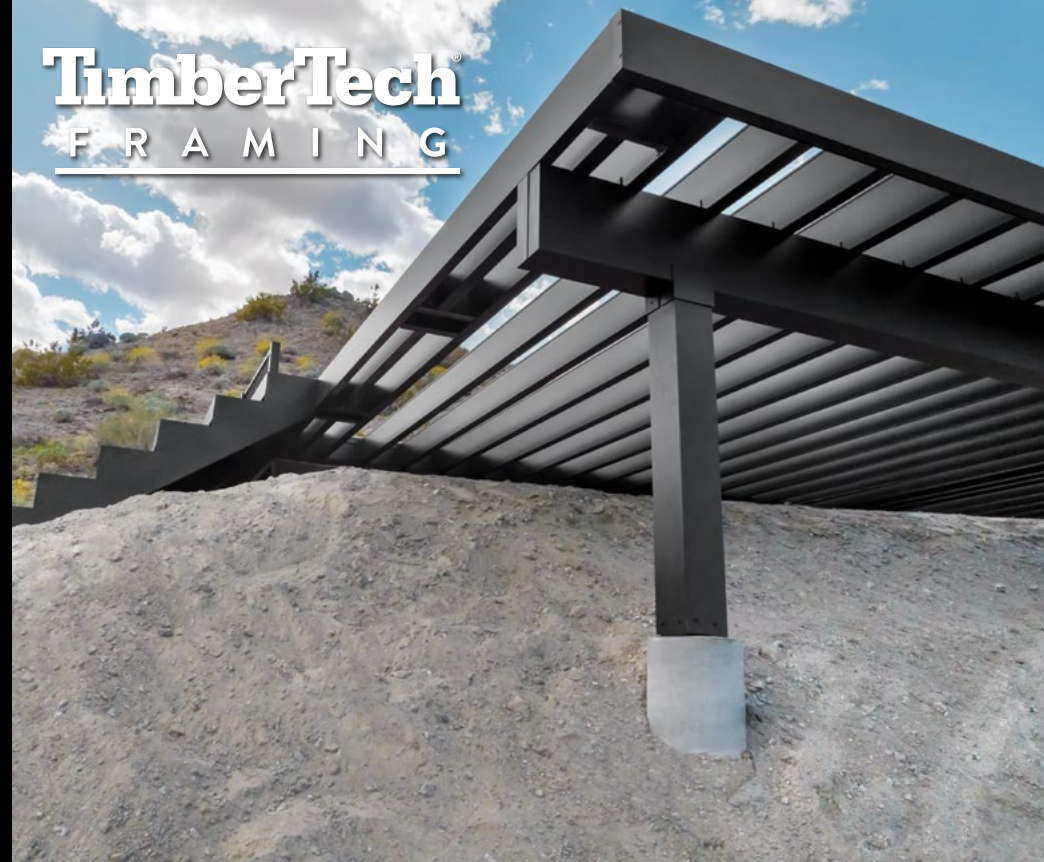

Precision engineering ensures surfaces remain flat over time.

RECYCLED STEEL

Made in the USA with a minimum of 25% recycled steel, which contributes toward LEED points.

UPGRADED DECK FRAME

Eliminates the headaches of new PT joists which can have defects & premature rot.

TimberTech® FRAMING

TIMBERTECH® ALUMINUM DECK FRAMING

TimberTech® Aluminum Framing gives you the long-lasting benefits you expect and outperforms other framing materials. Engineered for superior performance, TimberTech® deck framing is highly resistant to moisture damage like rust, corrosion, or mold.

TIMBERTECH® ALUMINUM FRAMING BENEFITS

FIRE RESISTANT

TimberTech® Aluminum Framing comes with a Class A Flame Spread Rating, the highest available.

EASY TO INSTALL

TimberTech®'s smart design boosts productivity by simplifying the installation process.

STRONG

The strength of a TimberTech® 2x8 aluminum joist is similar to the strength of a 2x12 wood joist.

SUSTAINABLE

Aluminum is made from recycled aluminum and can be recycled at the end of the project.

OUTDURE®

OUTDURE® ALUMINUM DECK FRAMING

The QwickBuild aluminum deck framing system is a versatile, moisture-proof, value-engineered, straight and level, structural solution designed for superior durability and efficient installation. Ideal for both low-height 'floating' systems over waterproof membranes, as well as structural solutions for elevated deck areas on various substrates.

OUTDURE® ALUMINUM FRAMING BENEFITS

MODULAR

Easy to install components, configurable to suit all deck projects.

MULTI-SURFACE

Maximize your space - select from hardwood, composite, & deck tiles.

MULTI-HEIGHT

A range of joist-beam profiles for ultra-low to elevated decks.

MULTI-SUBSTRATE

Build your deck over concrete, pavers, waterproof membrane, or natural ground

PWT™
FOCUSED ON EWP

PWT™ LVL TREATED WOOD DECK FRAMING

PWT™ Treated LVL is the ONLY LVL treated during the manufacturing process. The unique TRU-CORE® technology provides uniform dispersion of the treatment throughout the thickness and length of the material, for lasting durability in exterior as well as interior applications. Strength, stiffness and uniformity are all engineered in.

PWT™ LVL TREATED WOOD FRAMING BENEFITS

CONSISTENT STRENGTH

Software calculations and layouts are more convenient and accurate.

EASY TO WORK WITH

Weighs less than pressure treated lumber of equal size.

UNIFORMITY

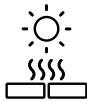

No twist or bow and no need for crowning joists.

SUSTAINABILITY

Wood is the right choice for a host of construction applications. It is the earth's natural, energy efficient, and renewable building material.

DECKING

IMPORTANT THINGS TO CONSIDER...

¹HEAT INDEX TEST

To get an accurate comparison, all deck surface temperatures were measured on the same 90 degree day, in full sun.

²OPTIONAL MAINTENANCE

Advantage Decking™ requires periodic maintenance to preserve its color. Looking for a grey deck? A hardwood deck will naturally grey over time but maintain its strength and integrity.

³ROOFTOP/LOW VENTILATION

Rooftop and low ventilation installations are not recommended for standard hardwood decking. We recommend deck tiles or some synthetic decking in these installations.

ABOUT OUR DECKING COMPARISON CHART

The chart provides a comprehensive comparison of some of the most popular decking options available at AdvantageLumber.com®, encompassing both hardwood and synthetic choices. We have meticulously evaluated various factors such as strength, real wood lifespans, and surface temperature concerns to deliver an insightful overview of each option's performance. This quick reference chart is designed to facilitate an easy comparison, helping you make an informed decision based on your specific needs and preferences.

*Refer to manufacturer's website for complete warranty information.

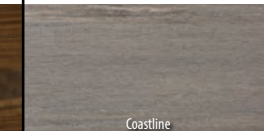

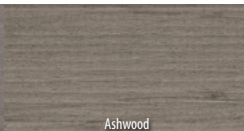

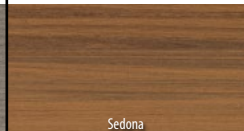

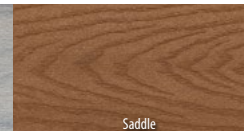

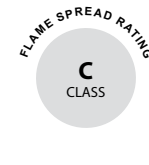

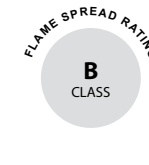

**All Advantage Decking™ species are sustainably harvested.

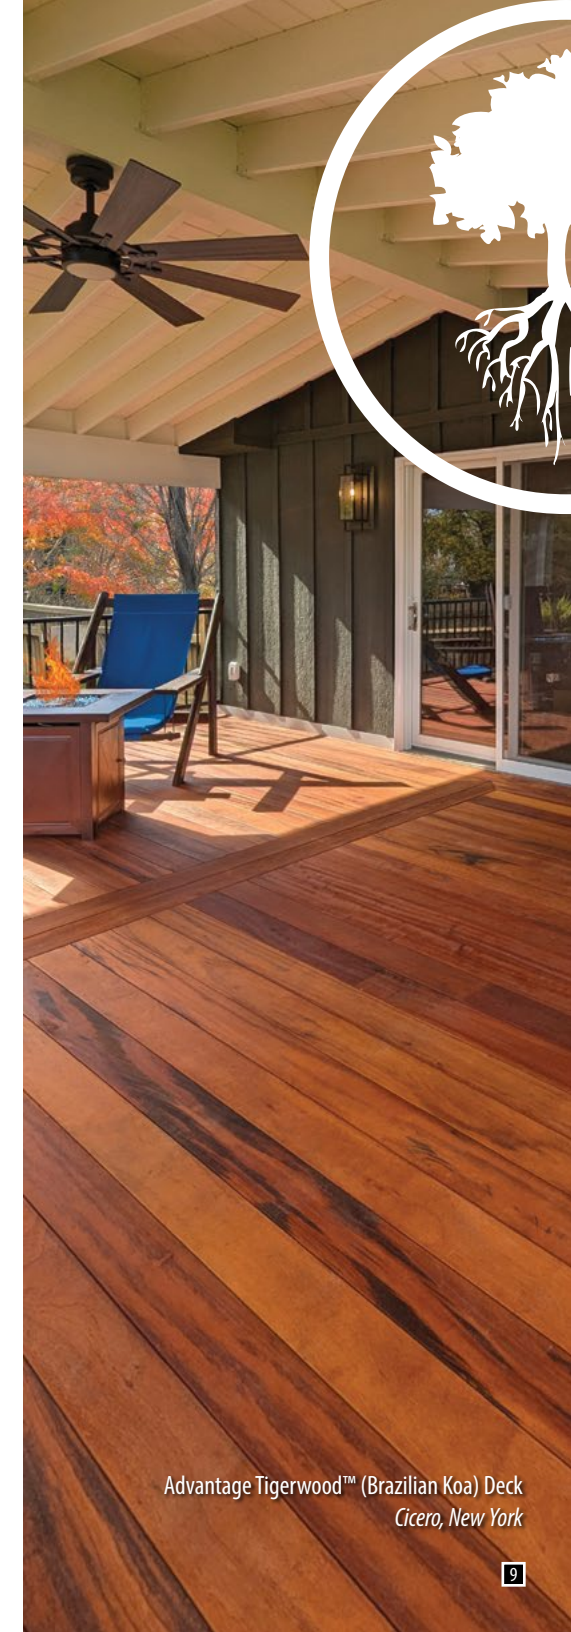

FSC® certified material is also available.

***Manufacturer's recommended joist span.

HARDWOOD INSTALLATION & FINISHES

Professional-grade accessories to prep, install, and maintain your exterior hardwood decking and siding.

FEATURED ITEM

TINT COLORS:

WISECOAT®

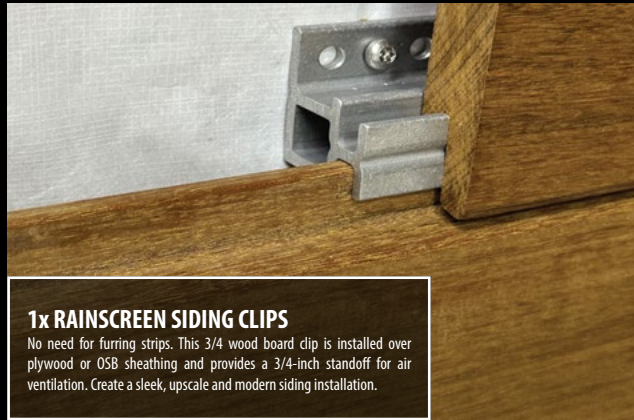

Premium Deck, Siding & Fence Sealer

Water-based wood sealer warranted to prevent water intrusion for up to 10 years. This is a waterproofing sealant designed for use on most any wood species and can be tinted for an enhanced visual appeal.

IPE CLIP® HIDDEN DECK FASTENERS

Unlike most all-metal hidden deck fasteners, which can react with wood, causing staining, the Ipe Clip® allows for the natural expansion/contraction of any hardwood decking.

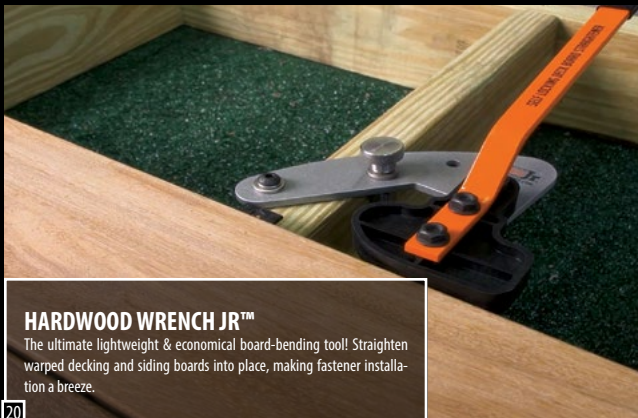

1x RAINSCREEN SIDING CLIPS

No need for furring strips. This 3/4" wood board clip is installed over plywood or OSB sheathing and provides a 3/4-inch standoff for air ventilation. Create a sleek, upscale and modern siding installation.

5/4 RAINSCREEN SIDING CLIPS

Crafted from solid 304 Grade stainless steel, DeckWise® 5/4 Rainscreen Hidden Siding Fasteners create a sleek and upscale look. May be used to install rainscreen siding vertically, horizontally, or at an angle.

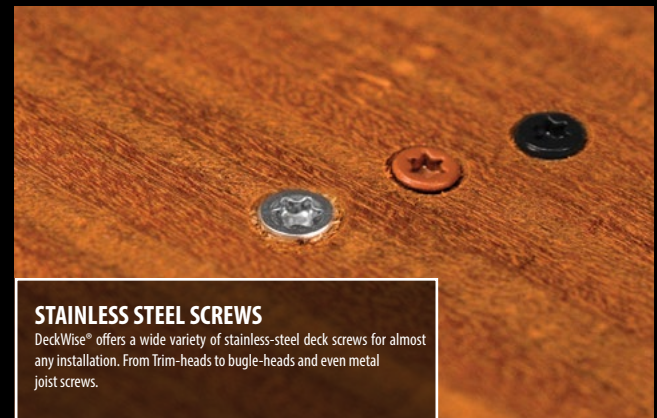

HARDWOOD WRENCH JR™

The ultimate lightweight & economical board-bending tool! Straighten warped decking and siding boards into place, making fastener installation a breeze.

HARDWOOD WRENCH™

The Hardwood Wrench™ tool is true "One-Man, One-Hand Installation", meaning it is easy to operate with a single deck installer with many benefits over other methods of straightening deck boards.

STAINLESS STEEL SCREWS

DeckWise® offers a wide variety of stainless-steel deck screws for almost any installation. From Trim-heads to bugle-heads and even metal joist screws.

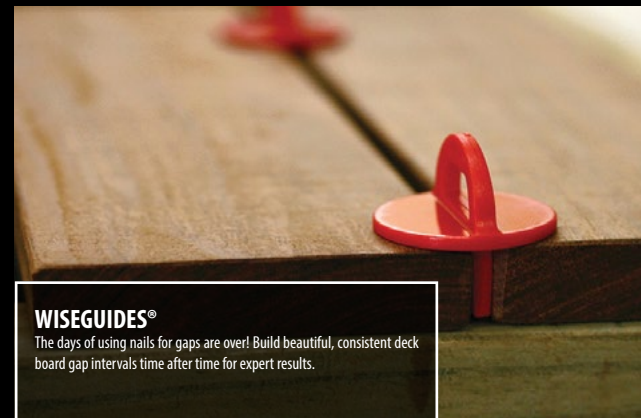

CLEANER & BRIGHTENER

DeckWise® Wood Deck Cleaner & Brightener remove dirt and greying in preparation for applying finishes.

HARDWOOD PLUGS

Create a smooth face-screw install with these wood plugs, available in a range of wood species.

WISEGUIDES®

The days of using nails for gaps are over! Build beautiful, consistent deck board gap intervals time after time for expert results.

WISESEAL® & IPE SEAL®

Water-based WiseSeal® (paintable and stainable after 24 hours) or Wax-based Ipe Seal® End-Grain Sealant is specially formulated to protect against checking and cracking on fresh-cut ends of boards.

DRILL & DRIVE™

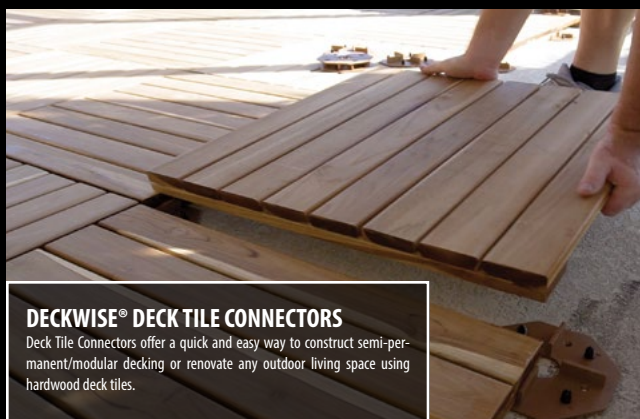

The Drill & Drive™ is a 3-in-1 tool you can use to pre-drill, countersink, then flip the insert and drive screws into decking.

WISEWRAP® & JOISTTAPE®

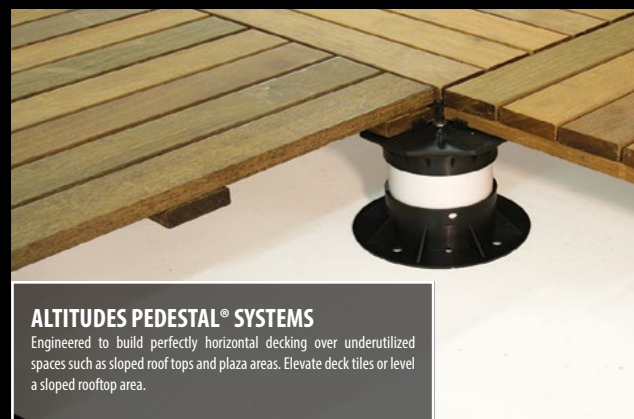

Protect joists from wood rot, decay, and corrosion with JoistTape™—a self-sealing, waterproof tape available in asphalt or butyl, featuring a self-adhering adhesive.

DECK TILE SYSTEM

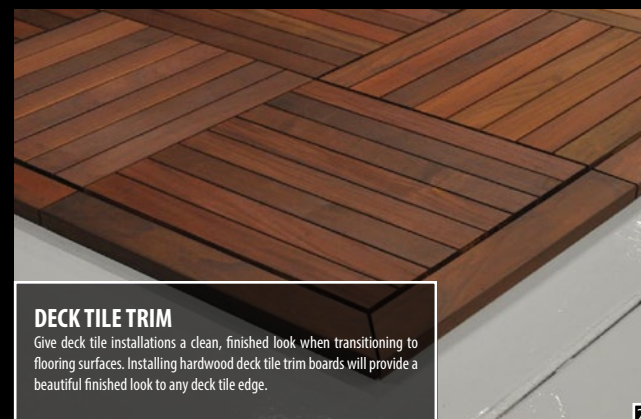

DECKWISE® DECK TILE CONNECTORS

Deck Tile Connectors offer a quick and easy way to construct semi-permanent/modular decking or renovate any outdoor living space using hardwood deck tiles.

ALTITUDES PEDESTAL® SYSTEMS

Engineered to build perfectly horizontal decking over underutilized spaces such as sloped roof tops and plaza areas. Elevate deck tiles or level a sloped rooftop area.

DECK TILE TRIM

Give deck tile installations a clean, finished look when transitioning to flooring surfaces. Installing hardwood deck tile trim boards will provide a beautiful finished look to any deck tile edge.

SLEEPER SYSTEM AVAILABLE

Low Ventilation Patio/Rooftop Installations

For ground-level patios or rooftop decks, water management is an important aspect of your build. The DecXorators® Sleeper System elevates your deck surface, helping protect your deck boards from damage due to moisture buildup.

SURESTONE® TECHNOLOGY

DecXorators® mineral-based composite decking is made with patented Surestone® technology to deliver a cool, comfortable, safe, and lightweight surface for your outdoor space. Mineral-based composite decking boards allow you to recreate a wood-floor look or create a totally custom design for your raised deck, in-ground patio, or boat dock.

WESTERN RED CEDAR - *BEAUTIFUL & VERSATILE*

Western Red Cedar is a top choice for outdoor projects like siding, decking, and ceilings—and for good reason! This durable wood is naturally resistant to rot, decay, and insect attacks, ensuring anything you build with it will stand the test of time. Its resilience means your outdoor structures will not only look beautiful but also require less maintenance over the years. With its timeless aesthetic and unmatched durability, Western Red Cedar is the ideal material for creating long-lasting, low-maintenance outdoor spaces.

WHY WESTERN RED CEDAR?

BEAUTY

Aesthetically, there really is no substitute for the natural beauty of Real Cedar. Imbued with decidedly crisp, yet superbly rich, tonal properties, Real Cedar can create sublime outdoor sanctuaries, embolden traditional home decor, provoke cutting-edge architecture and inspire innovative interiors. Imagine – all that dynamism packed into one beautiful building material!

VERSATILITY

Western red cedar is pitch and resin-free. Which means it's ideal for accepting and holding a wide range of beautiful finishes including elegant dark stains, shabby chic bleaches, traditional solid colors and naturally beautiful semi-transparents. Real Cedar also offers a wide range of lumber dimensions, surface textures and grades. Ergo, no matter what your desired effect is, AdvantageLumber.com's got the Cedarwood for you.

SUSTAINABILITY

Independent studies prove that when it comes to environmental performance, natural wood is superior to synthetic products in every way. While other building materials generate greenhouse gases, western red cedar actually removes greenhouse gases from the atmosphere. And unlike brick, cement and composites, Real Cedar is renewable and biodegradable. Plus, Real Cedar is sourced from the most sustainably managed forests in the world.

ADVANTAGE™

THERMAL

ELEVATED STYLE & INGENUITY

AdvantageLumber.com® proudly offers Advantage Thermal-ly Modified Wood, crafted for versatile indoor and outdoor applications like siding, decking, and dimensional lumber. We start with select-grade, domestically grown, responsibly harvested timber, then transform it through a thermal modification process using only heat and steam. The result? A performance-driven material that retains the natural beauty and design appeal of wood—completely free from harsh chemicals. With its durability and elegance, Advantage Thermally Modified wood is the perfect choice for sustainable, stunning projects.

HARDWOOD BOARDS

We proudly offer a diverse selection of premium interior hardwood boards, featuring a wide range of species to suit any design or woodworking need. Available in various widths, these high-quality S4S (surfaced on four sides) boards are precision-milled for consistency and ease of use. Whether you're crafting custom furniture, cabinetry, shelving, or decorative accents, our stocked inventory is ready to help you bring your vision to life. With our commitment to quality and sustainability, you can trust that every board is not only beautiful but also responsibly sourced to meet the demands of your next woodworking project.

LIVE-EDGE WOOD SLABS

We are one of the largest producers of live-edge slabs. Our slabs are kiln-dried to provide maximum stability and to eradicate any insects. We cut over 100 species of hardwoods including Indian Rosewood, Walnut, Camphor, Tigerwood, Brazilian Cherry, Persimmon, and many other hard-to-find lumber types. We offer surfacing, sanding, epoxy filling of voids, spray-finishing, book-matching, and gluing services, and we ship directly to you. Our slabs are often used for kitchen tables, bar tops, end tables, coffee tables, shelves, doors, wall art, benches, and many other woodworking projects.
